Chief Executive Officer,
PITC, Aiwan-e-Iqbal Complex,
Lahore.

Subject: Development of Monitoring Application for “Apna Meter Apni Reading” Initiative

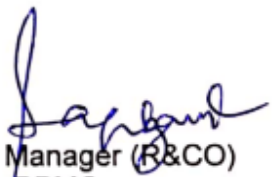

The Prime Minister of Pakistan launched the “Apna Meter Apni Reading” mobile application on June 28, 2025, to empower consumers to submit real-time images of their electricity meter readings on the scheduled date. This initiative is a significant step toward reducing overbilling complaints, enhancing transparency, and improving consumer trust in the billing system.

To monitor the initiative’s implementation, the Minister (Power Division) has directed the development of a centralized monitoring application. This application must track usage by consumers and response from field formations, with drill-down capability from DISCO to circle, division, sub-division and feeder levels. It should allow the Ministry, PPMC and DISCOs remote access to real-time data.

The following data structure is proposed for integration:

DISCOs	Registration						Uploaded Picture and Field Formation Response						
	Completed	Unable to Complete	Reason for Failure to complete				Uploaded	Accepted	Not Accepted	Reason for not Accepted Picture			
			No Internet	Slow in response time	Difficult to understand	Application crashed				Blurred Image	Wrong Meter	Date Mismatch	Defective Meter
Nos.	Nos.	Nos.	Nos.	Nos.	Nos.	Nos.	Nos.	Nos.	Nos.	Nos.	Nos.	Nos.	

PITC prompt action in development of desired application will ensure transparency, data-driven monitoring, and public trust in the success of this flagship consumer empowerment initiative.
